Why a MNS?

Research on brain function in health and disease is among the priorities for today's societies, and several indicators put the mediterranean research area among strategic issues for building new profitable relationships. Many South-North collaborations and networks have emerged in recent years through bilateral and multi-lateral actions, supported by the EU or by international and national actions, whether for setting up teaching curricula, or by building human potential. The MNS is created to support and help strengthening all initiatives that bring together mediterranean neuroscientists.

The last MNS conference was organized in Sardinia (Italy), after four previous successful editions (Montpellier 1997; Marrakech 2006, Alexandria 2009 and Istanbul 2012). These conferences gather up to 400 scientists from all Mediterranean and other countries, and offer a rich program with world-class lectures, symposia, poster sessions and social events. These meetings have proved to be highly beneficial, not only for the scientific exchanges, but also in terms of training opportunities for students and young researchers.

Objectives of the MNS

The MNS works towards three main objectives:

- Strengthen exchanges between mediterranean neuroscientists
- Promote education in Neuroscience and increase public awareness
- Sustain the Mediterranean Neuroscience Conference

To reach these objectives, the MNS's policy is to work in close cooperation with existing national and international Neuroscience and Scientific Societies.

OFFICIAL MNS2017 CONFERENCE VENUE

RADISSON BLU RESORT SAN JULIAN

<https://www.radissonblu.com/en/stjuliansresort-malta>

After a successful 2015 meeting in Cagliari (Sardinia, Italy), the next meeting will take place in Malta in 2017. We look forward to welcoming you to Valletta, the capital of Malta, on June 2017 for an engaging scientific experience among the world's top neuroscientists. For further information please contact Professor Giuseppe Di Giovanni at giuseppe.digiovanni@um.edu.mt, the Coordinator of Malta Neuroscience and the President of the organising committee of 6th MNS meeting.
